1. Introduction P.1

goes at the top

Chirp! Chirp! Chirp!

there's a lonely chirp
in the distance then

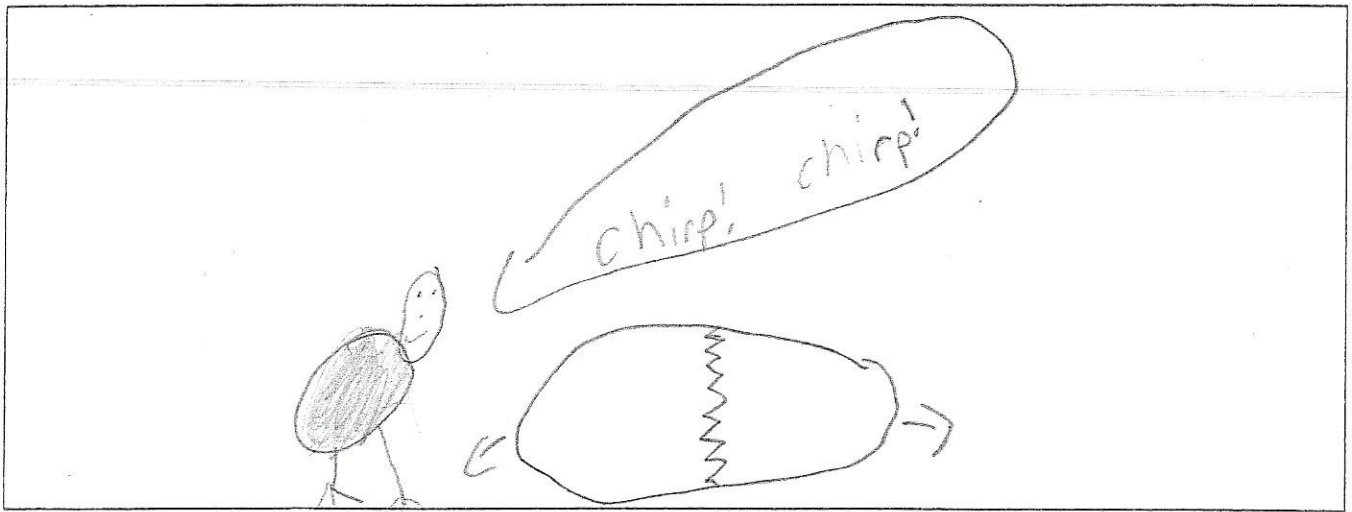

more voices join

in the chorus of chirps

sends happiness in you

what's making this

sound? birds!

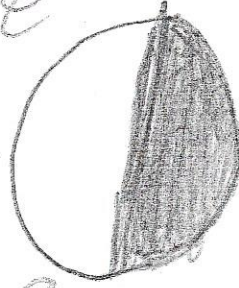

chirp! chirp!
 Birds are not mammals
 Because they hatch
 from eggs. Birds can fly
 But if they didn't
 have wings then they →
 can't fly. where do
 Birds live? (A). tree
 (B). ground (C). all of the
 above.

Correct is C

eggs

chapter: 3

the side that is white
is the
size of a

egg.

eggs are about

half the size of a

base ball, ^{really fun!} fun fact it takes

a LONG time

for a bird to come out

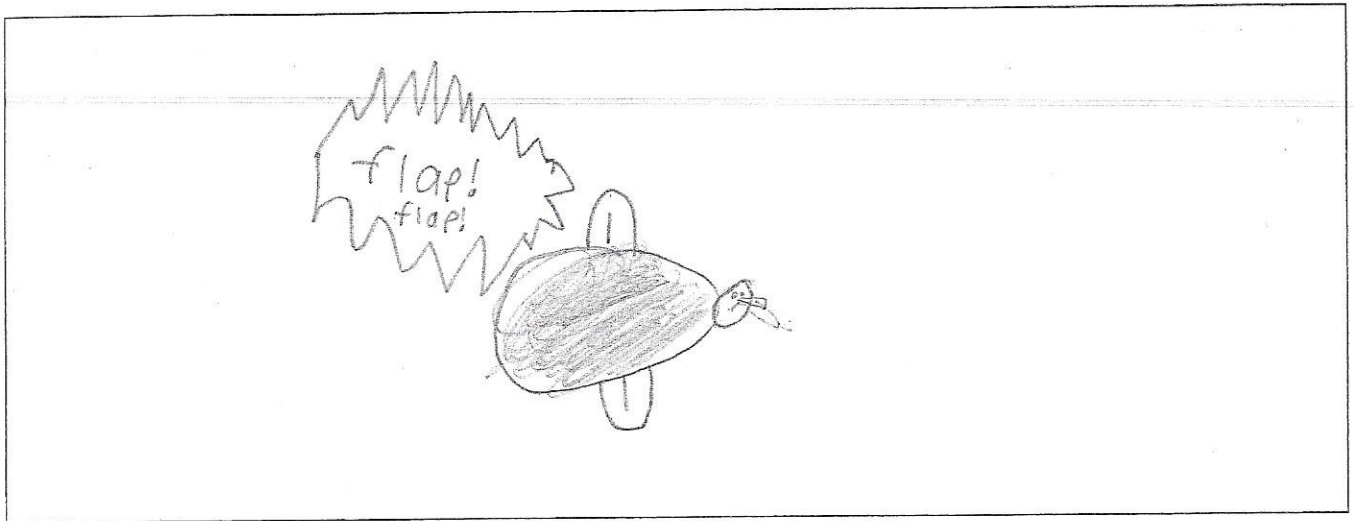

of a egg about

11 months. what happens

when the dad tryed to feed the
kids in the fog? answer: he mist

Sight

chapter: 4

Birds have AMAZING

eye sight. Can birds

see

(A) really good!

(B) really poor

(C) Maybe good

I know I helped

you. they have really good

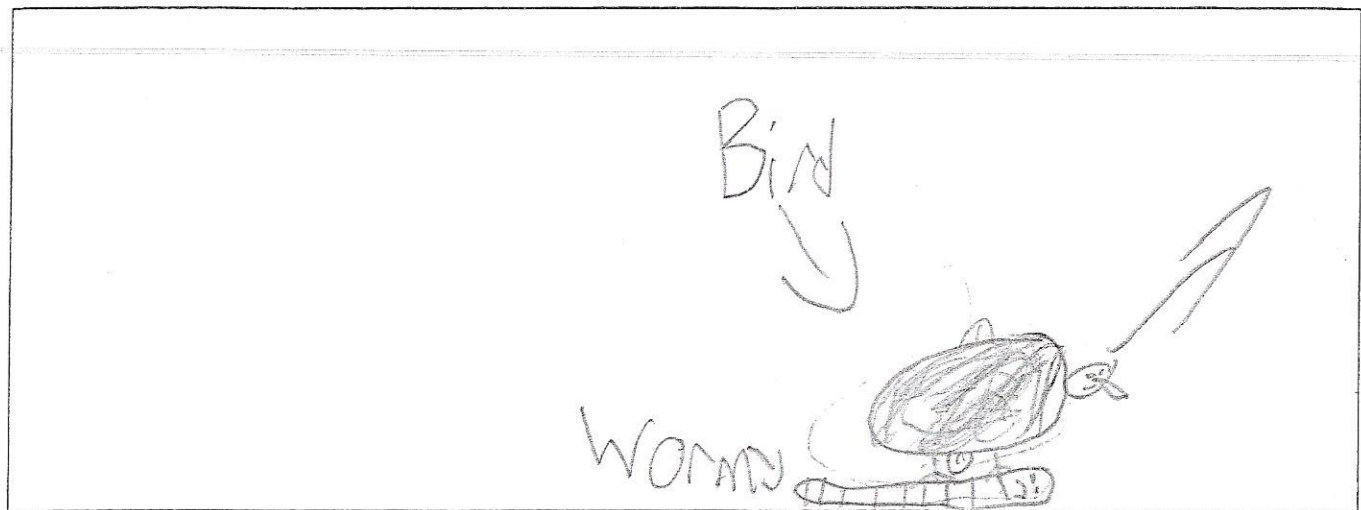

eye sight. they use their

eye sight to hunt mostly.

(A) Correct

hunting

chapter 5

Ahhhhhhhhhhhh!

Swooooooop!

the bird swoops down

and grabs the worm!

then he feeds

the worm to the

the little birds.

and that is the end
of the worm!

I taught you about.

how Birds get wings.

how Birds hatch.

how Birds

use their

sight.

and how Birds hunt.
