

STUDENT WORK – DETERMINING IMPORTANCE – GRADE 1

(Refer to Book Summary or the text itself to help in analyzing student responses.)

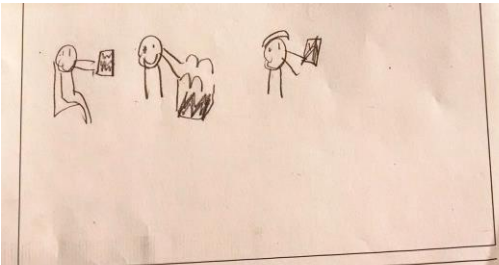

1

George Washington taught his students about plants and farming

2

George taught farmers about other crops. He made Cheese, ink, and soap from peanuts)

3

people remember him for helping farmers. George showed farmers how people could use peanuts and sweet potatoes. These crops helped make the soil fertile again.

4

He made too things.

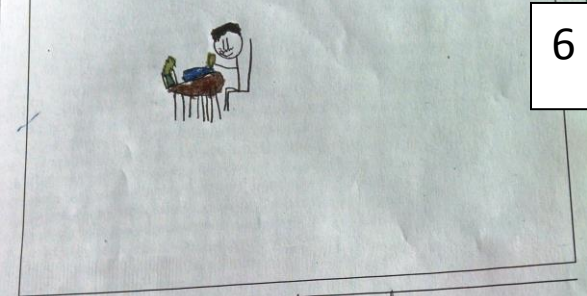

5

He studied about Beutels
plants.

The student wrote this after conferring with the teacher. He did not have anything on his paper previously. As shown in the video clip, she took him to the anchor chart and he chose the first statement on the chart to write.

6

George washington carver
is important becasue he
he studied plants.

7

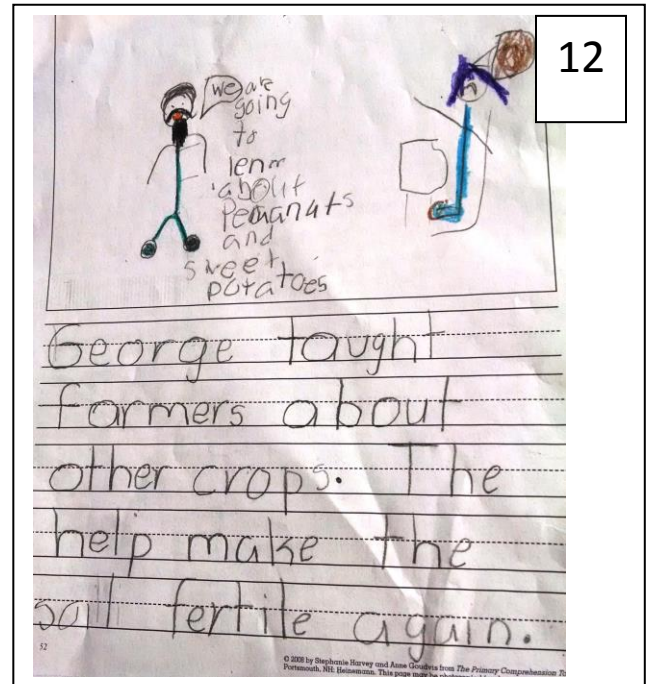

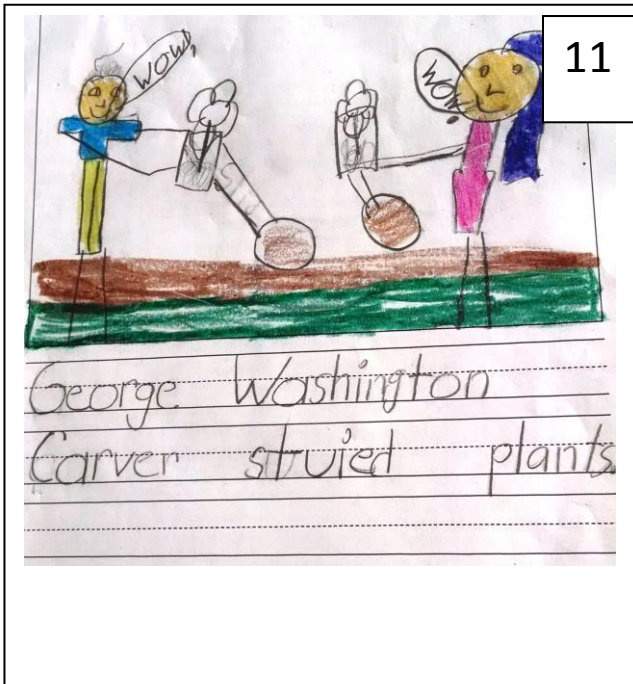

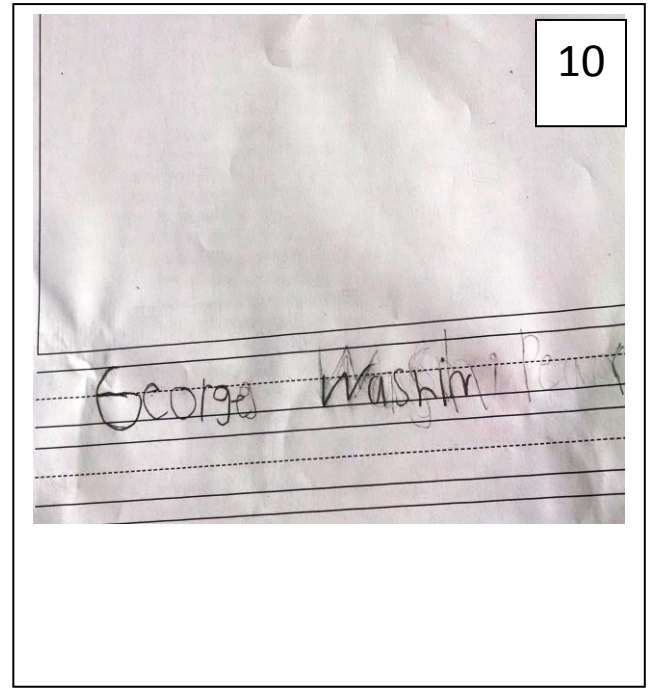

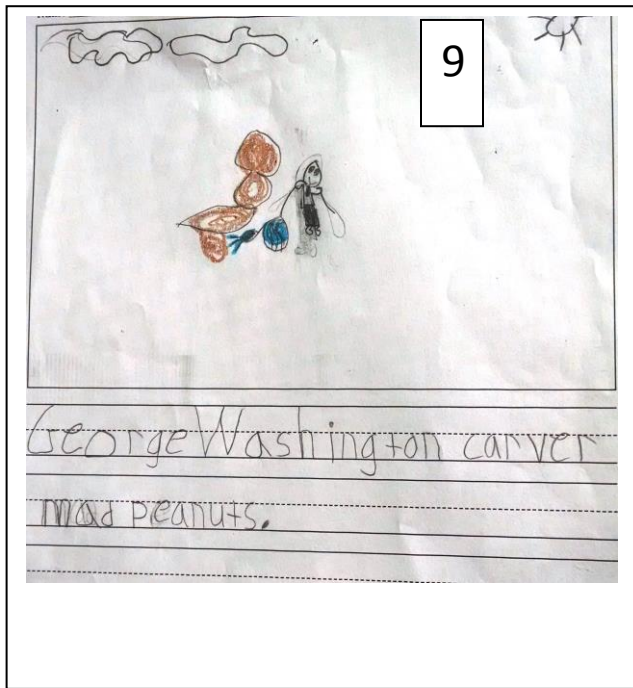

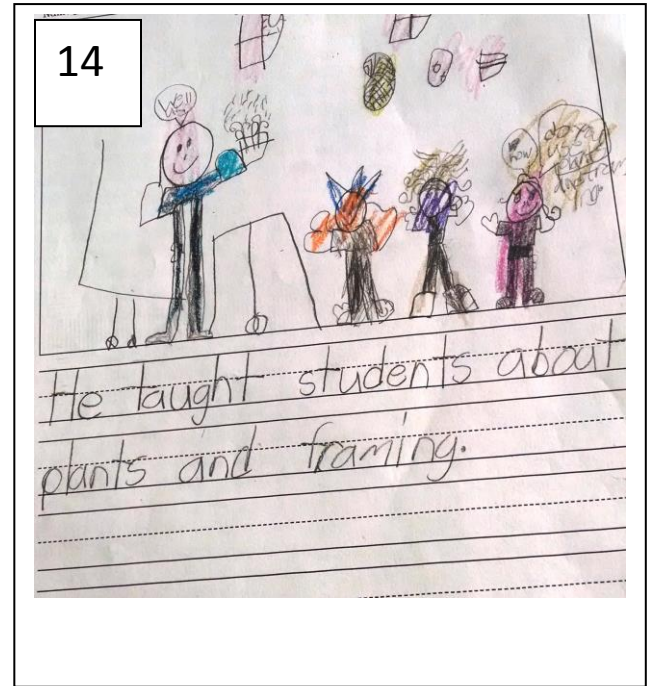

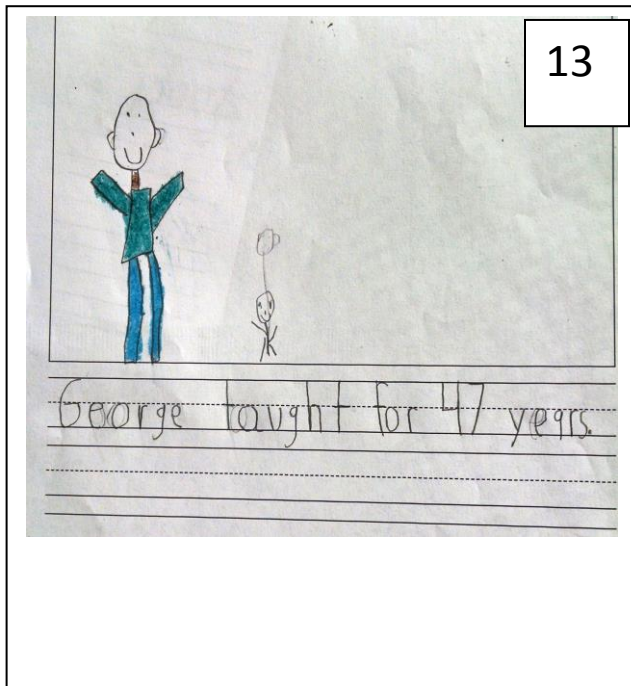

George be come to
teach,
and George is the
became to be the
farmer and the

8

He showed farmers how to
use penuts and sweet potatoes.
He taught them about other crops
to help the soil. He was an
inventor.

Portions of the last 3 pages of the text, **George Washington Carver** by Martha E.H. Rustad, Capstone Press First Biographies, 2002, are given below, to help in analyzing the students' responses.

Page	Portion of Text
17	George taught farmers about other crops. Farmers started growing peanuts and sweet potatoes. These crops helped make the soil fertile again.
19	George showed farmers how people could use peanuts and sweet potatoes. He made cheese...
21	George...died in 1943. People remember him for helping farmers. George is famous for inventing new ways to use crops.
